CONFIDENTIAL

- 2 -

- 6. There is no drainage system in Kian for surface runoff. There are neither storm sewers nor drainage ditches with the result that puddles do collect in low spots throughout the city.
- 7. There is no garbage collection in Kian, nor is refuse of any sort collected with the result that the garbage merely rots in place or is burned. Streets are to be kept clean by each household.
- 8. Burial is the method for disposal of the dead.
- 9. No organized pest control is employed in Kian

Medical and Hospital Facilities

There are two hospitals available to the people of Kian. They offer medical, dental, nursing and obstetrical facilities but no surgical.

I don't know their size or names

While Chinese and foreign drugs were available, the medical care was entirely in the hands of Chinese doctors who did not have a particularly high standard of proficiency. Further I would

50X1

50X1

sooner trust some of the cures of the local herb doctors than use any drugs of Chinese manufacture.

Local Health and Welfare

11. There are given to the general public vaccinations against small pox cholera and typhus.

Conclusions on Health and Sanitation

12. Health Conditions - Fair
Sanitation - Very poor

Sanitation - Available care in

Medical, Dental and Hospital - Poor

Climatic effect

on adults - Poor

Climatic effect

on children - Very poor

The only special precautions I suggest to remain in good health are all water should be boiled and food thoroughly cooked. I know of no special hazards which affected infants and children.

Supplemental information

13. There were quite a few high schools in Kian but the nearest available college or university was in Nanchang. All high schools taught English.
